1. SOLAS News

The SOLAS IPO has one copy of the book "Stream Ecology: Structure and Function of Running Waters" by J. David Allan (University of Michigan), Kluwer Academic Publishers, 388 pp. [Chapter titles: 1. Channels and flow, 2. Streamwater chemistry, 3. Physical factors of importance to the biota, 4. Autotrophs, 5. Heterotrophic energy sources, 6. Trophic relationships, 7. Predation and its consequences, 8. Herbivory, 9. Competitive interactions, 10. Drift, 11. Lotic communities, 12. Organic matter in lotic ecosystems, 13. Nutrient dynamics, 14. Modification of running waters by humankind.] This book is available to a developing world scientist, student or library. Send us a brief statement of the value of this book to you (or your library) along with the mailing address.

The SOLAS International Project Office has obtained a number of copies of the US-SOLAS Science Implementation Strategy (120 pages). To receive a copy, send us an email, including full postal information.
