1. SOLAS News

The latest SOLAS Newsletter was published about a month ago. This volume focuses on the SOLAS International Summer School, and is available on the SOLAS website (<http://www.solas-int.org>). Hardcopies of any of the SOLAS Newsletters are available upon request (reply to this email with your full mailing address).

A few errata were discovered in the last SOLAS newsletter. A new member of the SOLAS SSC, Roland von Glasow, had his name mis-spelled on page 27, and we apologize for this mistake. In addition, Figure 2 accompanying the report on the meeting on South American Dust and Impacts (page 21) is incorrect. A correction will be placed on the SOLAS website. Again, our apologies for the mistake.

SOLAS will soon have a new website, thanks to the efforts of Justin Ho. Release is scheduled for the end of this month.

Today is the deadline for submission of abstracts to the European Geophysical Union (EGU) General Assembly in Vienna (13-18 April). Please note the IMBER/SOLAS Special Session (OS9): Including experimental work at sea or in the laboratory, remote sensing studies, and modeling studies of the biological, chemical, physical processes involved in the marine biogeochemical cycles, ecosystems, and their interactions; and exchange processes at the air-sea interface are also welcome.
