1. SOLAS News

The new SOLAS website is on-line, and we welcome your comments:

<http://www.solas-int.org>

The SOLAS International Project Office maintains a list of journal publications within the SOLAS science, and this will also soon be available on the website. If you would like your publications to be included for 2007, send them to me by email. The publications only need to be SOLAS science (biogeochemical and physical air-sea interaction) and be published in 2007 in a refereed journal. We don't need a copy of the paper, just the reference.

SOLAS is leading an EU-framework program funded networking project ("COST"). The Action (number 735) has a goal of developing global air-sea gas and particle flux products. During the upcoming EGU meeting in Vienna (April 14-18), each of the three Working Groups will hold open meetings to inform the larger community about the project. If you will be in Vienna, please come and join the discussion.

Working Group 1: Tuesday (April 15) 15:30-19:00; Short-lived species air-sea gas and particle exchange

Working Group 2: Monday (April 14) 15:30-19:00; Parameterizations of gas transfer

Working Group 3: Thursday (April 17) 15:30-19:00; Long-lived species air-sea gas exchange

For more COST Action-735 information: <http://www.uea.ac.uk/env/cost/>
